UNLEASH YOUR POTENTIAL

EMO 2013 is an exciting chance for your business to identify new opportunities and see the bigger picture with GF AgieCharmilles.

We will showcase customer success stories; introduce new, innovative products, solutions and services; and highlight application and process expertise.

We will show our complete technology and services portfolio, including Milling, EDM, Laser, Automation and Customer Services.

Whether your focus is on cutting costs, exploring new business areas or seeking inspiration from examples, look no further than GF AgieCharmilles' stand at EMO 2013.

UNLEASH YOUR POTENTIAL WITH GF AGIECHARMILLES

As GF AgieCharmilles' EMO presence clearly demonstrates, the Group goes a step beyond providing success-enabling technologies, products, process specific know-how and application expertise to help you unleash your potential, identify new opportunities and see the big picture.

"Today GF AgieCharmilles is better positioned than anyone in our industry to trigger our customers' success across a wide range of fast-growing market segments, like Electronic Components, Information and Communications Technology (ICT), Automotive, Aerospace and Aeronautics, and Medical and Dental," said GF AgieCharmilles President Pascal Boillat. "At EMO 2013, our visitors will get a clear picture of our dedicated solutions — including our new CUT 200 Dedicated machine for aerospace, which will be exhibited virtually — and how we help them recognize and seize opportunities."

GF AgieCharmilles' promise to help you unleash your potential has its foundation in the Group's core values.

"Everything we do today is highly customer-oriented, from the solutions we develop as a result of our close collaborations in growing industry areas to our commitment to extending our own expertise through training within our GF AgieCharmilles Academy," Boillat said. "At the same time, we constantly monitor the global technology and manufacturing landscapes for opportunities for our customers. 'We put customers first' is one of our core values, one that we are committed to living every day in service of our customers around the world."

Boillat said EMO 2013 is the perfect opportunity to experience the GF AgieCharmilles difference.

"I think our EMO guests will be surprised both our world premiere products and Customer Services, which represent the potential for process improvements, cost savings and pursuing new business areas," he said.

GF AgieCharmilles Head of Sales and Marketing Håkan Pfeiffer agreed.

"Our EMO 2013 visitors will go home inspired by very real examples of how we can help them take their businesses to the next level of success," he said.

Bernhard Kasper, GF AgieCharmilles Head of Market Region Europe, explained that the Group's EMO 2013 stand represents industry's broadest portfolio of solutions and application and process expertise, with a full offering of technologies and services: Milling, EDM, Laser, Automation and Customer Services.

« Today GF AgieCharmilles is better positioned than anyone in our industry to trigger our customers' success across a wide range of fast-growing market segments. »

Pascal Boillat, President GF AgieCharmilles

« With access to industry insights, our customers can make informed decisions about how to better support their own existing customers and the best approaches for winning new business in their markets. »

« Our EMO 2013 visitors will go home inspired by very real examples of how we can help them take their businesses to the next level of success. »

Håkan Pfeiffer, Head of Sales and Marketing

"Our stand will feature five zones: three zones showcasing customer success stories in the tool, mold and die industry and the production of high-value parts; one showcasing our value-adding Customer Services programs, including a Fitness 360° concept; and one — in the center of our stand — focusing on GF AgieCharmilles' know-how in five fast-growing market segments," Kasper said.

During EMO 2013, GF AgieCharmilles will conduct a series of live presentation on the stand: the Industry Affairs Show, aimed at helping visitors see the bigger picture by providing insights into what is important to their customers and how markets and industries are developing.

"GF AgieCharmilles is uniquely positioned to explain these developments. Well-informed customers are better able to identify and unleash their true potential," said Kasper. "With access to industry insights, our customers can make informed decisions about how to better support their own existing customers and the best approaches for winning new business in their markets."

Those unable to experience GF AgieCharmilles' EMO presence are invited to take part in EMotion Days, November 6-8, 2013, at the Group's Center of Competence in Schorndorf, Germany.

BE INSPIRED

It is safe to say that our stand will be an exciting place to visit during EMO 2013. We'll help you identify new opportunities by seeing the bigger picture.

Our stand will showcase customer success stories; we will introduce new, innovative products, solutions and services; highlight application and process expertise, and illustrate new ways in which you can enhance your businesses in fast-growing market segments.

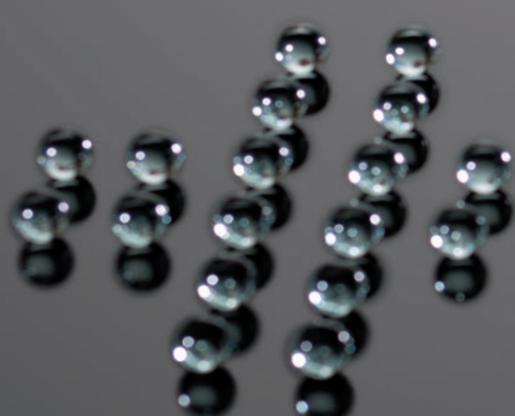

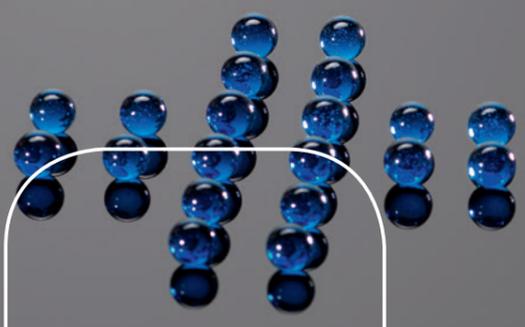

The stand will feature five zones: Three zones will showcase customer success stories in the tool, mold and die industry, and the production of high-value parts; one will showcase GF AgieCharmilles' value-adding Customer Services programs; and one zone, in the center of the stand, focuses on our know-how in five fast-growing market segments.

Just as a fit body requires a 360° approach to unleash your potential and ensure optimal power, agility and endurance, so do your machine tools. GF AgieCharmilles Customer Services' Operations Support, Business Support and Machine Support are your greatest resources for increasing your uptime and keeping your machine fleet fit for success.

Visit our Customer Services area, perform a funny fitness check, and enjoy an energizing drink to be ready for EMO 2013.

Throughout the show, we will run a series of live presentations on the stand in our Industry Affairs Show, focused on helping existing and prospective customers see the bigger picture by providing them with insight into what is important to their customers and how industries and markets are developing.

GF AgieCharmilles is uniquely positioned to explain market developments. Well-informed customers will be able to identify and unleash their true potential. With access to industry insights, you will be able to make informed decisions about how to better support your existing customers and the best approaches for winning new business in your markets.
